Level 1

Oroville Dam Auxiliary Spillway Incident

State Operations Center

Level 1

On 05/08/17 at 0928 hours the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will begin the scheduled increase in flows to the Feather River on 05/10/17 at 0500 hours.

- Total flow will gradually increase from 7,750 cfs to approximately 30,000 cfs by 1130 hours.
- The Oroville Dam Flood Control Spillway flow will increase to 30,000 cfs.
- Hyatt Power Plant will be operated as needed to meet ramping and storage demands.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) as of 05/10/17 at 1800 hours:

Level 1

- Inflow: 19,742 cfs.
- Outflow: 30,143 cfs.
- The current lake elevation is 848.44 feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) On Scene.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

Solano County: Sacramento River at Rio Vista

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage: Placer County:

- Merced River Yosemite at Pohono Bridge is forecast to be at flood stage at 10.0 feet on 05/10/17 at 2200 hours.
 - Potential Impacts: Flood Stage. Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- · Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- · San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- · Merced County: Merced River at Stevinson

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

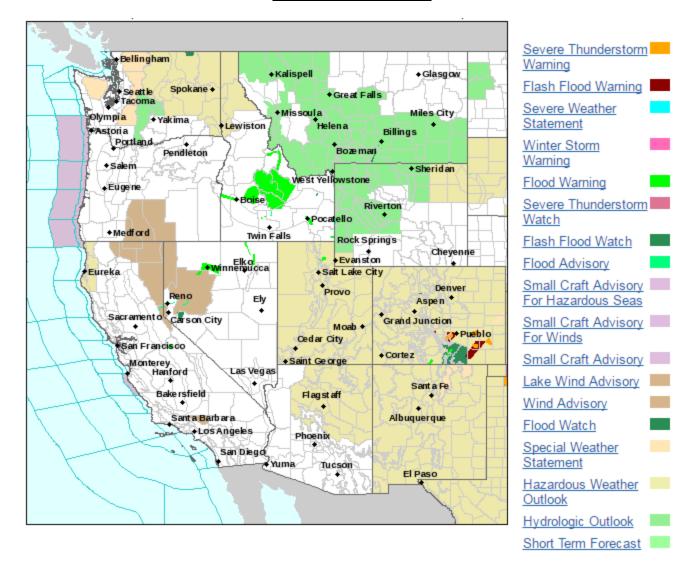

Deep low pressure trough in the Gulf of Alaska will be the main weather influence on the weather throughout Northern California over the next several days. Several waves of light showers and isolated thunderstorms and gusty southwest winds will move through the region between this evening and next Monday. Temperatures will still be a few degrees above normal under scattered high clouds today, then cooler than normal weather is expected for the next week or more. Clouds will increase in northern areas this afternoon, and by late today a few showers or isolated thunderstorms will be possible in the far northern mountains. More light rain showers and isolated thunderstorms are possible Thursday through Monday, with chances greater in northern areas. Snow levels will start out above 7000 feet, but drop to as low as 4000 feet by the end of this week. The closed-low core of the trough will be moving across Northern California on Tuesday and Wednesday with widespread rain. At this time it appears that cool, wet, unsettled weather could continue into late May.

SOUTHERN CALIFORNIA

A weak ridge of high pressure over California will bring warming to the deserts through Thursday, but onshore flow and a deep marine layer will keep temperatures near to a little below normal from the mountains westward. Maximum temperatures will remain in the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. A Pacific trough will form over the West Coast bringing a little below normal temperatures to the entire region Friday through the middle of next week. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert areas Thursday afternoon through the middle of next week. Isolated afternoon showers and thunderstorms will be possible over the Sierra Monday through the middle of next week. Minimum humidity will be mainly above 30% away from the deserts through the middle of next week.

WEATHER MAP

Cal OES LAW ENFORCEMENT MISSIONS

Closed Cal OES Law Missions

- 2017-LAW-35737, 05/09/17, 1936 hours: Cal OES Law Enforcement Duty Officer (LDO) was notified by the International Emergency Response Coordination Center (IERCC) of an In-Reach SOS activation. Coordinates plot in Los Angeles County, near Grassy Hollow Campground, Angeles Crest Hwy 2 on the Pacific Crest Trail (PCT). IERCC texted the registered owner's device with no response. At 1940 hours, new coordinates were received. The registered owner's emergency contact (mother) was contacted and stated her daughter has been hiking the PCT for approximately six weeks. Her trip is expected to last a few months. Recently she had met a group and was hiking with them. Cal OES LDO notified the Los Angeles County Sheriff, Altadena Station Dispatch. UPDATE: 05/09/17, 2018 hours, Per the IERCC they received a cancellation text from the device stating the activation was accidental. Cal OES LDO notified the Los Angeles County Sheriff. Mission Closed.
- 2017-LAW-35729, 05/09/17, 1615 hours: Cal OES LDO was notified by the IERCC of an In-Reach SOS activation in Santa Cruz. Per the IERCC the registered owners are hiking in the Santa Cruz Mountains near Felton and Fall Creek Park. Just before the In-Reach device was activated, the registered owners texted their son that they were in camp for the night and safe. The In-Reach SOS activation was received at approximately 1600 hours by the IERCC. UPDATE: 05/09/17, 1700 hours, Per the IERCC the actual activation and coordinates were transmitted on 04/28/17. On 04/28/17, the registered owner was testing the device and transmitted an SOS but quickly shut off the device. The activation was not received by the IERCC on 04/28/17 because the device was quickly shut off. Today when the registered owners turned on the device to contact their son, the 04/28/17 SOS activation transmitted to the IERCC. Per the IERCC, after placing the call to Cal OES, they rechecked the transmission and discovered it was an old activation. The IERCC contacted the Cal OES LDO and canceled the mission. Mission Closed.

Cal OES MISSIONS

Cal OES Missions

• 2015-IREOC-19846: One RAWS weather station to Amador OA – On scene 11/30/15, expected to be left in place until May 2017. Mission Ongoing.

Closed Cal OES Missions

• 2016-IREOC-21748: Tasking Caltrans to extend state highway right of way to facilitate hazard tree removal. This is a long term mission and is expected to remain in place through the summer months. **Mission Closed.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
